Maintained consistent communication with MD and clinical staff in homecare agency for continuity of care and safety in the home. Evaluated need for other rehab disciplines during homecare episode and after discharge from agency. Family and patient education for role of rehab, PT plan of care and expected outcomes.

Gwinnett Medical Hospital System, Lawrenceville, GA

October 1999 – March 2004

Staff Clinical Physical Therapist

Outpatient pediatric therapy: Evaluated and treated pediatric population with range of developmental delays, sensory processing disorders and premature birth developmental clinic. Developed aquatic physical therapy program. Provided family education for patient diagnosis and successful home/school carryover. Created rehab documentation forms and family education packets for various diagnoses. Increased patient referrals and clinic revenue during employment.

Neonatal Intensive Care Unit: Provided developmental assessments for all premature infants born from 24 to 34 weeks gestation. Prescribed developmental positioning and therapeutic activities for caregivers/nurses. Family education for developmentally supportive care during stay and discharge to home. Training for newly hired nurses in developmental care.

Inpatient: Evaluated and treated orthopedic, neurological and medical patients. Developed and implemented ante partum therapeutic program. Training for nurses and nurse technicians on ante partum unit.
